

# About VMware

VMware is the leader in cloud infrastructure, business mobility and virtualization software. A pioneer in the use of virtualization and policy-driven automation technologies, VMware simplifies IT complexity across the entire data center to the virtual workplace, empowering customers with solutions in the software-defined data center to hybrid cloud computing and the mobile workspace.

With 2014 revenues of \$6.04 billion, VMware has more than 500,000 customers, 75,000 partners, and 18,000+ employees in 120+ locations around the world. At the core of what we do are our employees who deeply value execution, passion, integrity, customers, and community. Want to be part of a compassionate community that thrives on architecting what's next in IT?
